

EMERGING SUSTAINABLE FUNDS

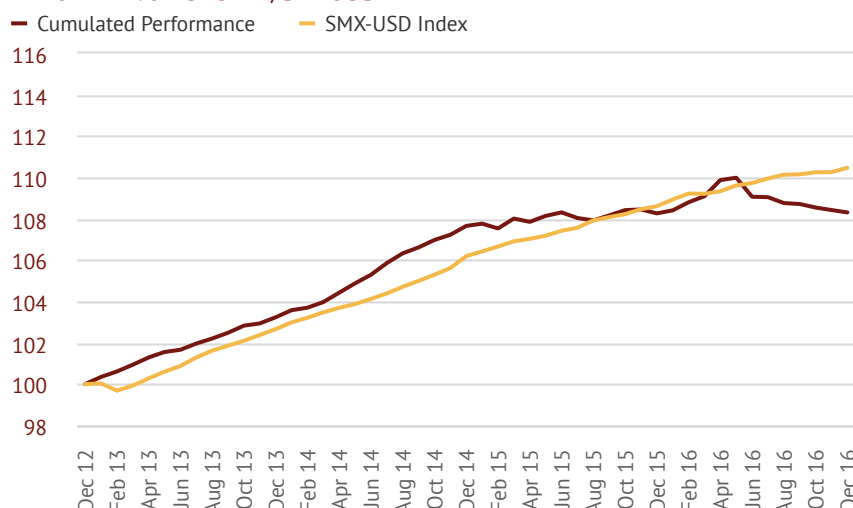

SYMBIOTICS SICAV - SIF

YOUR MULTI-STRATEGY GATEWAY TO IMPACT INVESTING

MANAGER'S COMMENT

In the last month of 2016 the AD-USD share class recorded a modest negative return of -11 bps, primarily driven by provisions on certain positions at the sub-fund level. The fixed income portfolio not exposed to currency risk had a positive performance for the month, with two of the four underlying funds showing a positive performance. The high yield portfolio consisting of one fund was negative due to provisioning on investments in Sub-Saharan Africa. The equity portfolio targeting Sub-Saharan listed companies recorded a strong positive return for the month, as African markets recovered part of the losses suffered late last year following the US presidential election and growing global trade concerns. Through its six underlying investments, the Fund provides financing to micro, small and medium enterprises in emerging and frontier markets and has so far helped create approximately 78,000 jobs in 49 countries. End-borrowers financed through the Fund are active mostly in trade (27%) and agriculture (17%).
